\* Thermostat is not included

## ELECTRICAL UNDERFLOOR HEATING SYSTEMS - IQ FLOOR CABLE

IQ FLOOR CABLE — kit, suitable for more complex layouts and available with power outputs for either 3” or 4” cable spacing. The cable kit has different levels of power depending on intensity of heat desired. If you had a cold garage under your kitchen you would rather choose 3” than 4” spacing.

### IQ FLOOR CABLE – 120V\*

| Model Number            | Length (ft) | Heated Area (sq ft) |      | Output (W) | Price (CAD) |

## ELECTRICAL UNDERFLOOR HEATING SYSTEMS – IQ THERMOSTAT

| Product                        | Functions  | Maximum switching current (A) | Price (CAD) |
|--------------------------------|--|-------------------------------|-------------|
| Programmable IQ THERMOSTAT     | Individual programming of events, built-in GFCI, digital display, multi voltage 120-240V | 15                            | 145.70      |
| Non-programmable IQ THERMOSTAT | Built-in GFCI, multi voltage 120-240V  | 15                            | 142.50      |
| Power Module                   | Thermostat power extender  | 15                            | 102.00      |

**Programmable IQ THERMOSTAT** controls the IQ FLOOR MAT and IQ FLOOR CABLE systems. Can be programmed for up to 7 days with 4 events per day. There is an override function. Energy consumed in the past year appears at the push of a button.

**Non-programmable IQ THERMOSTAT** familiar to most Canadians, this hands-on, high-quality thermostat, with GFCI protection, allows easy and constant adjustment of the temperature in your room. Every day is different, and every week offers opportunities for new outside and in-home enjoyment. Suit yourself!

### Power Module

Time is money, and being able to connect to your IQ THERMOSTAT from a second location in a large room, or from another room completely, will provide rewards. And with GFCI protection, your safety is assured. Customize for convenience.

## PIPE FREEZE PROTECTION KIT- IQ PIPE

IQ PIPE Freeze Protection, Kit, composed of a heating cable that regulates itself, has an end seal, a power cord and a plug, and is preassembled. There is a choice of 7 lengths of cable for 120 volts, and 4 lengths for 240 volts. The insulated electric heating cable can be safely crossed over or doubled back on if the cable is longer than the pipe or if spigots or connections exist. You can depend on IQ PIPE to instantly, consistently and reliably replace the heat lost by pipes in cold weather.

### IQ PIPE – 120V
